

**The Tab of GuangDong Pharmaceutical University
Experimental Animal Ethics Committee Inspection**

Concerned information wrote by applicant	Experiment title: In vitro hemolysis test of domestic rabbit red blood cells Applicant: Yan Wang			
Information filled by Experimental Animal Ethics Committee	Number of experimental animal ethical inspection tab: <i>gdphlai 2023315</i>			
	Inspection contents:			
	Inspection clauses	Inspection explanations	Yes	No
	1. Necessity of animal experiment	Does the experimental plan is scientific and reasonable?	<input checked="" type="checkbox"/>	
		Does the animal experiment cannot be simulated by other models without using animal?	<input checked="" type="checkbox"/>	
		Does the animal experiment is base on <i>in vitro</i> experiment?	<input checked="" type="checkbox"/>	
	2. Rationality of the animal species used in the experiment	Do the animals used in present experiment cannot be instead by other smaller animals?	<input checked="" type="checkbox"/>	
		Does the animal species used in the experiment is necessary?	<input checked="" type="checkbox"/>	
	3. Rationality of the animal amount used in the experiment	Does the least number of experimental animal are used under the condition that conforms to the statistical requirements?	<input checked="" type="checkbox"/>	
		4. Does the operation plan conform to ethical requests?	Does anesthetization is used for animal before operation?	<input checked="" type="checkbox"/>
Does the anesthesia drug and anesthesia way are rational?	<input checked="" type="checkbox"/>			
Does the operation way reduce the pain degree of animal to the lowest in circumstances that could satisfy the requirement of experiment?	<input checked="" type="checkbox"/>			
5. Does the nursing intervention conform to ethical requests?	Does the nursing intervention reduce the pain degree of animal to the lowest after operation?	<input checked="" type="checkbox"/>		
	Does the best nutrition and feeding environment is provided for animal?	<input checked="" type="checkbox"/>		
6. Rationality of the experimental period	Does the experimental period is shortest under the condition that could satisfy the requirement of experiment?	<input checked="" type="checkbox"/>		
	7. Does the disposal of animal after experiment conform to ethical requests?	Does the disposal way reduce the pain degree of animal to the lowest after experiment?	<input checked="" type="checkbox"/>	
Does the disposal way of experimental animal, Specimens and wastes correspond to the harmless disposal scheme?		<input checked="" type="checkbox"/>
